

**Crescent Bar Shoreline Informational Meeting Minutes**  
**Quincy Fire Department**  
**1201 Central Avenue South**  
**March 21, 2009 – 10:00 AM**

**Attendees:**

Kelly Larimer, Grant County PUD  
Jerri Mickle, Grant County PUD  
Sheryl Dotson, Grant County PUD  
David Stipe, Project Groundwork  
Heather Ostenson, Project Groundwork  
General public

**Meeting Minutes**

**I. Welcome and Introductions**

Kelly Larimer welcomed the residents of Crescent Bar, neighboring communities and interested citizens to the meeting. She introduced the Grant PUD staff as well as the consulting firm of Project Groundwork. She gave a brief overview of the agenda and what topics would be discussed at the meeting.

**II. FERC License Recreation Requirements**

Jerri Mickle gave a PowerPoint presentation outlining the original FERC license, the relicensing effort and the requirements that Grand PUD has in regards to the implementation of the new issued license.

**III. Public Recreation & Shoreline Enhancement Options**

Also discussed within the PowerPoint presentation was the opportunities to enhance the Crescent Bar area. The major focal point of the recreation enhancements to be completed within the next few years will be focused off the island complex. Items such as the boat launch upgrade, dredging of the channel, parking lot improvements, potential campground alterations and added amenities, and a plan to stabilize the shoreline around the campground area were discussed.

**IV. Conceptual Trail Site Plan**

Heather Ostenson and David Stipe from Project Groundwork discussed the work they are currently doing as consultants for Grant PUD. They displayed

poster boards with conceptual alignments of the proposed trail along the shoreline off the island. Questions were raised concerning the exact location of the placement of the trail. David provided information on the current survey work and that these drawings were in the early stages and were conceptual. All were reminded that Grant PUD has an obligation to protect the natural and cultural resources in the area and to work with agencies, tribes and interested parties to make sure that the FERC requirements are met.

V. **Next Steps**

When final surveys have been completed Grant PUD will begin the process of working with Project Groundwork on site designs that will be discussed at future meetings. An invitation was made to all attendees continue to be involved during this process.
