

How to Add New Homepage Promos

Homepage Carousel:

Once you've logged into the Front-End editor, simply click on the homepage promo to access its controls on the left hand side.

Within the controls on the left hand panel, you'll see a series of "items" that are the actual promos.

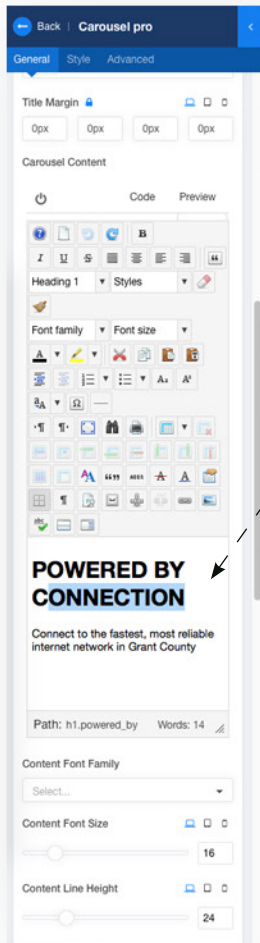

You can change the order of the promos, by clicking/dragging the arrow icons on the left of the item title.

To Edit an existing item, click the "Gear" icon, which will enable you to change its text, image and link.

To add a new item, you can either duplicate an existing item or the "Add Item" button.

To delete an item, click its garbage icon to the right.

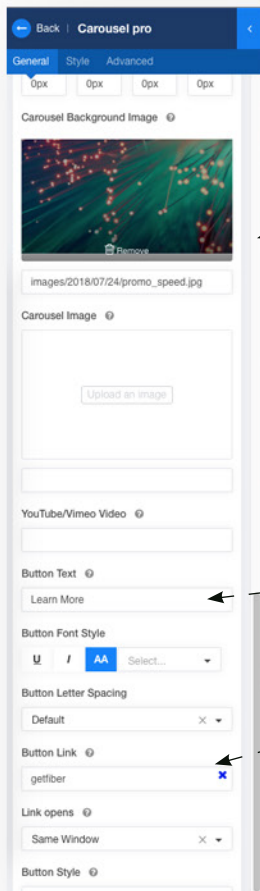

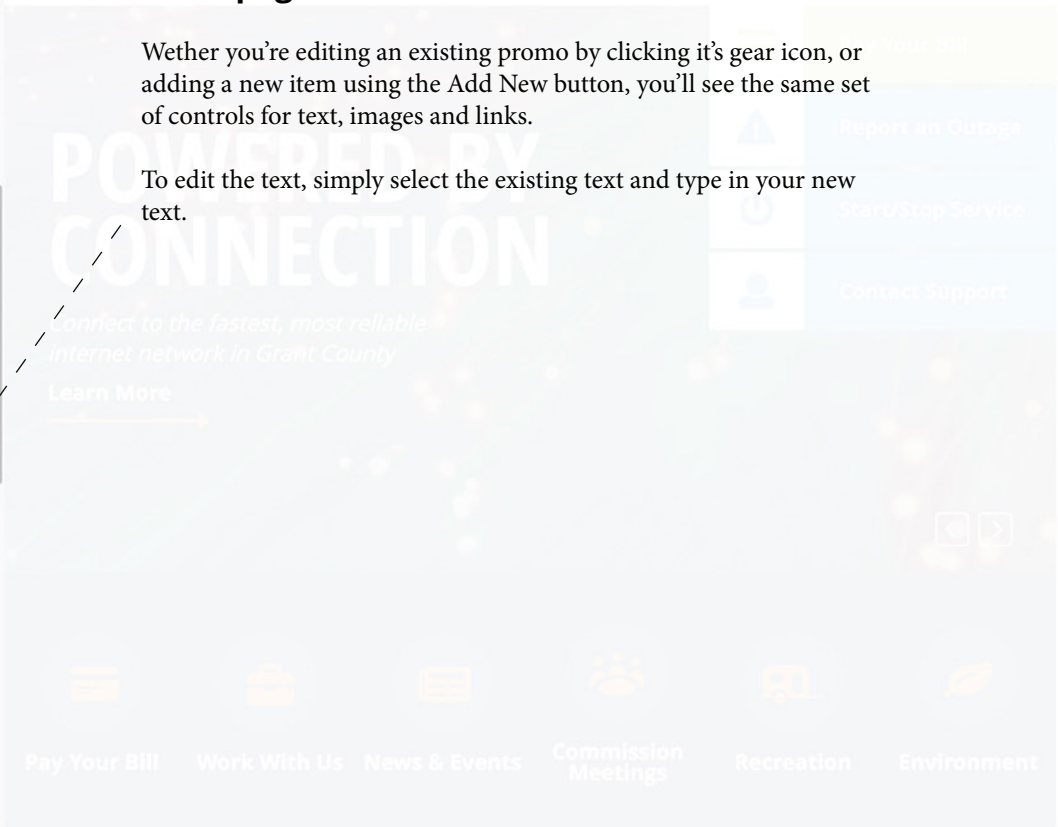

How to Edit Homepage Promos

Homepage Carousel:

Whether you're editing an existing promo by clicking its gear icon, or adding a new item using the Add New button, you'll see the same set of controls for text, images and links.

To edit the text, simply select the existing text and type in your new text.

To edit the background image, scroll down in the left panel and click "Remove" on the existing image, then "Upload" to add your new image. Images should be 1530x825 px to keep consistency with other promos.

To edit the button text and its link, type new text in the Button Text field, then paste the new link in the Button Link field.
